

# Denver International Airport Tour

Today we toured Denver International Airport. One of the things I learned was that there are 4 fire stations inside DIA. Also I learned that there is an animal control center inside of DIA. I liked seeing the owl and I thought it was interesting that they can send animal DNA to the Smithsonian. One of my favorite parts of the trip was going up into the control tower and seeing all of the planes from up there. Another one of my favorite part of the trip was walking on the tarmac next to the planes at the gate. It was also cool to see the Steelers land. We also saw a “Heavy” fedex Dc10 land. Today was a great day. One that I will never forget.
