

Everything that I saw at the airport made me appreciate how much effort is put into the aviation industry. I had no idea what a large effect each of the airports have on the whole system. We learned that if even two of the six runways are closed at DIA, it delays flights all over the nation. Seeing all of the work that is put into every single flight is something I'll appreciate every time I fly somewhere. I enjoyed seeing the top of the FAA tower on my tour. It was amazing to see all of the traffic that comes in and out of DIA. Everyone who gave the tour was friendly and extremely kind, and I would like to give a thanks to them for everything that they did to let us go on that tour. It was an amazing experience that I'll never forget.
